

THE SCIENCE FACULTY

The Science Faculty at The Sutton Academy consists of knowledgeable, passionate and enthusiastic teachers who strive to give students a thought provoking and enjoyable experience in every lesson.

INTRODUCTION

The Science department aims to educate students so that they develop enquiring minds and to nurture a passion for Science.

The Science faculty currently consists of 13 teachers and 3 lab technicians. Staff benefit from a positive, collaborative working environment with excellent classroom facilities. We are looking for an enthusiastic Senior Lab Technician who will contribute to all aspects of the Faculty and will play a key role supporting the safe delivery of experiments and Science lessons across KS3-KS5. This is an excellent opportunity for the successful candidate to be a part of thriving, rapidly developing faculty and take of advantage of the excellent CPD on offer within the Academy.

CURRICULUM

The Science Faculty has developed our 3 year KS3 curriculum so students are able to study a broad and challenging range of topics. The KS3 curriculum will give students the knowledge and practical skills they need to prepare them for KS4. In KS4, students are taught by 3 specialist teachers who support them to develop their knowledge and practical skills further through studying AQA GCSE Combined Science Trilogy or AGA GCSE Triple Science. Sixth Form Science uptake is increasing and students can choose to study A Level Biology, Chemistry, Physics and BTEC Forensic Investigation.

THE DEPARTMENT

Engagement in Science lessons is excellent, and the department participates in a programme of after school revision sessions, which are well subscribed and eagerly attended. The right candidate must have a passion to continually promote this and aim to expand and develop our extra-curricular provision.
